

# LinkedIn

Head over to [LinkedIn developers](#)(opens in a new tab) and create a new app.

The screenshot shows the LinkedIn Developers 'My apps' page. At the top, there is a navigation bar with 'DEVELOPERS' and several menu items: 'Products', 'Docs and tools', 'Resources', and 'My apps'. On the right side of the navigation bar, there is a notification bell and a user profile icon. Below the navigation bar, the page title is 'My apps'. In the top right corner, there is a blue button labeled 'Create app' which is circled in red. Below this, there are two app cards. The first card is for 'Gitroom', showing its logo, Client ID: 8612hvvvuykm5, and creation date: Feb 11, 2024. The second card is for 'Linvo', showing its logo, Client ID: 86s17okyegb6l, and creation date: Nov 5, 2020. Both cards indicate they are 'Company verified'.

Fill in all the details, once created head over to Products and make sure you add all the required products.

The screenshot shows the LinkedIn Developers 'Products' page for the Gitroom app. The page title is 'Gitroom' with Client ID: 8612hvvvuykm5 and Created: Feb 11, 2024. Below the title, there are navigation tabs: 'Settings', 'Auth', 'Products' (which is selected), 'Webhooks', 'Analytics', and 'Team members'. The main content area is titled 'Products' and shows 'Added products'. There are three product cards: 1. 'Share on LinkedIn' (Default Tier) with description 'Amplify your content by sharing it on LinkedIn' and links for 'View docs' and 'View endpoints'. 2. 'Advertising API' (Development Tier) with description 'Build marketing experiences to reach the right audiences' and links for 'View docs', 'View endpoints', and 'View Ad Accounts'. 3. 'Sign In with LinkedIn using OpenID Connect' (Standard Tier) with description 'Using the OpenID Connect standard' and links for 'View docs' and 'View endpoints'. On the right side, there is a section titled 'Managing products' with a sub-section 'Additional product requests' containing text about product-relevant use cases and approval processes.

It is important to request the Advertising API permissions and fill up the request form, or you will not have the ability to refresh your tokens.

Make sure your redirect URL is set to `http://localhost:4200/integrations/social/linkedin` for local development. Copy the created `Client ID` and `Client Secret` and add them to your `.env` file.
